FIELD LEVEL NOTES

1. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: PregWomenExpended Row Name: Pregnant Women Column Name: Expended

Year: 2009 Field Note:

The expended amount for Pregnant Women was higher than the budgeted amount due to overall program increase in expenditures for the expansion of the Nurse Family Partnership Program for this category.

Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: Children_0_1Expended Row Name: Infants <1 year old Column Name: Expended

Year: 2008 Field Note:

FY 2008 expenditures were consistent with previous years while the budgeted amount was set too high.

3. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: AllOthersExpended Row Name: All Others Column Name: Expended Year: 2009

Year: 2009 Field Note:

There was an increase in Medicaid revenue for the Family Planning Program which decreased the federal allocation.

Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: AllOthersExpended Row Name: All Others Column Name: Expended Year: 2008

Field Note:

Additional state funding was available in FY 2008, requiring less federal funding to cover expenditures for family planning services.

5. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: AdminExpended Row Name: Administration Column Name: Expended

Year: 2009 Field Note:

The expended amount for Administration was higher than the budgeted amount due to the DHH Information Technology department being transferred from Office of Public Health (previously reported as direct charges) to the DHH Office of Secretary (now reported as overhead/administration charges).

6. Section Number: Form4_I. Federal-State MCH Block Grant Partnership

Field Name: AdminExpended Row Name: Administration Column Name: Expended

Year: 2008 Field Note:

The FY 2008 budget was set too low and the expenditures grew at a consistent level over the past few years post-hurricanes Katrina and Rita.

FIELD LEVEL NOTES

Section Number: Form7_Main Field Name: PregWomen_TS Row Name: Pregnant Women Column Name: Title V Total Served

Year: 2011 Field Note:

Unduplicated count of Maternity patients for SFY 2009 based upon the COMPASS patient encounter system. Due to encounter system's inability to decipher between pregnant women and non-pregnant women seeking pregnancy tests in the public health units, all women of reproductive age receiving pregnancy tests in the health units are reported under pregnant women. The count also includes women served by contracts that do not report through COMPASS, or 408 initial prenatal visits, and women participating in the Nurse Family Partnership home visitation program, or 2538 families in SFY 2009.

Section Number: Form7 Main Field Name: PregWomen_XIX Row Name: Pregnant Women Column Name: Title XIX %

Year: 2011 Field Note:

Based upon Maternity Medicaid paid clients reported in the COMPASS patient encounter system. No other insurance breakdown is given

FORM 10 TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT STATE PROFILE FOR FY 2011 [Sec. 506(A)(1)]

[SEC. 506(A)(1)] STATE: LA

1. State MCH Administration:

(max 2500 characters

Louisiana's Title V program is administered by the State Sections of Maternal and Child Health and Children's Special Health Services. These programs are housed within the Office of Public Health's Center for Preventive Health. The Office of Public Health is one of the five major agencies within the Louisiana Department of Health and Hospitals. MCH/CSHS Programs provide personal health services and local public health functions at parish health units distributed throughout the State. The MCH program serves a large portion of the State's MCH population, providing outreach and case management; health education and social marketing campaigns to address the leading causes of morbidity and mortality of the MCH population; and infrastructure building services including surveillance, needs assessment, and building systems of care for high risk populations.

Block Grant Funds	
2. Federal Allocation (Line 1, Form 2)	\$ 13,360,844
3. Unobligated balance (Line 2, Form 2)	\$ 1,203,156
4. State Funds (Line 3, Form 2)	\$ 24,910,587
5. Local MCH Funds (Line 4, Form 2)	\$ 943,936
6. Other Funds (Line 5, Form 2)	\$ 3,700,000
7. Program Income (Line 6, Form 2)	\$
8. Total Federal-State Partnership (Line 8, Form 2)	\$\$
9. Most significant providers receiving MCH funds:	Parish Health Units, Louisiana State University
	Health Sciences Center, Primary Care Centers
	Health Sciences Center, Primary Care Centers, New Orleans Health Department, Tulane University
10. Individuals served by the Title V Program (Col. A, Form 7)	New Orleans Health Department, Tulane University
10. Individuals served by the Title V Program (Col. A, Form 7) a. Pregnant Women	New Orleans Health Department, Tulane University
	New Orleans Health Department, Tulane University Health Sciences Center, Children's Hospital N,O.
a. Pregnant Women	New Orleans Health Department, Tulane University Health Sciences Center, Children's Hospital N,O. 58,230

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:

(max 2500 characters)

e. Others

Parish Health Units: MCH provides prenatal care services and comprehensive preventive child health services at parish health units and contract agency sites in areas with health access problems. School-Based Health Centers: MCH's Adolescent School Health Initiative funds and provides technical assistance to 69 school-based health centers statewide. Home Visitation: MCH operates a nurse home visitation program for first-time mothers, entitled Nurse Family Partnership (NFP) in all regions of the state. Children with Special Health Care Needs: CSHS provides direct medical evaluation and treatment services for chronic and disabling medical conditions in children. Parent support and care coordination services are also provided by CSHS.

b. Population-Based Services:

(max 2500 characters

Sudden Infant Death Syndrome (SIDS) Program: MCH operates a risk reduction campaign, and provides public and professional education, grief counseling and autopsy and death scene investigation. Partners For Healthy Babies: MCH operates a statewide multimedia campaign which utilizes a toll free hotline to link callers with prenatal care, and educates about healthy behaviors during pregnancy. Newborn Screening Programs: The Genetics and Newborn Screening Program assures the screening of all newborns in the State. The Hearing, Speech, and Vision Program coordinates newborn hearing screening statewide. Injury Prevention: MCH funds regional injury prevention coordinators to inform the public of injury prevention approaches.

c. Infrastructure Building Services:

(max 2500 character

MCH operates the Pregnancy Risk Assessment and Monitoring System (PRAMS). Birth and infant death data are analyzed and includes linkages with Medicaid and Newborn Screening programs. The CSHS program has initiated a medical home project to increase primary care access to CSHCN. CSHS has taken leadership in developing a birth defects registry for Louisiana. MCH has initiated an infant mortality reduction initiative effort in each region with public and private partner agencies. In conjunction with the state Office of Mental Health and Office of Addictive Disorders, MCH coordinates a screening, referral, and treatment program for perinatal substance abuse, depression, and domestic violence. MCH monitors pregnancy, birth, infant, and child death data to target resources which address leading causes of death.

The National Immunization Survey (NIS) is sponsored by the National Immunization Program (NIP) and conducted jointly by NIP and the National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention. The survey is a list-assisted random-digit-dialing telephone survey followed by a mailed survey to children's immunization providers. Estimates of vaccine coverage are produced for the nation and for each of 78 Immunization Action Plan (IAP) areas, consisting of the 50 states, the District of Columbia, and 27 large urban areas. Final 2008 data from the NIS survey for Louisiana indicates 81.9 + 4.6% of children within the ages of 19-35 months are at the appropriate immunization level for age for the vaccine series 4:3:1:3:3:1 which now includes 1 dose of Varicella vaccine in the series.

Numerator							
Denominator							

1. Section Number: Form11_Performance Measure #9

Field Name: PM09 Row Name: Column Name: Year: 2009 Field Note:

The Oral health Program has completed the Basic Screening Survey and the final results are available to share. According to the survey, 41.9% of third grade children had untreated dental caries, 65.7% had dental caries experience, only 33.2% had dental sealants on at least one of the permanent molar teeth, and 42.7% had to be referred to dentists for treatment. The total number of children screened were 2642(Denominator) and out of that only 899 (Numerator) had dental sealants. To calculate the percent of 3rd graders with dental sealants, the weighted numbers have been used for the numerator and the denominator which represent the 3rd grade population in the state. The value of the weighted numerator is 16,223 and the value of the denominator is 48,894.

2. Section Number: Form11_Performance Measure #9

Field Name: PM09 Row Name: Column Name: Year: 2008 Field Note:

The real values for the numerator (N) and denominator (D) are 899 and 2642 and the weighted values of N and D have been used to calculate annual indicator. The State Oral Health Program has preliminary results of the Basic Screening Survey. According to these results, 33.2% of Louisiana 3rd grade children have dental sealants on at least one of their permanent molar teeth. There are 41.9% percent of children with untreated caries and 65.7% of children with caries experience.

3. Section Number: Form11_Performance Measure #9

Field Name: PM09 Row Name: Column Name: Year: 2007 Field Note:

The State Oral Health Program has begun collecting sealant prevalence data on 3rd graders statewide, every 5 years. This data is used to tabulate the sealant prevalence rate for FY2006 because the Oral Health Program is confident that this data more accurately reflects the sealant status of this population than the data previously collected more than 5 years ago.

1. Section Number: Form11_Performance Measure #11

Field Name: PM11 Row Name: Column Name: Year: 2009 Field Note:

This year's data is provisional and based upon 2006 National Immunization Survey (NIS) data. LaPRAMS 2006 data indicated that 17.02% of mothers breastfed their infants at 6 months of age, however, LaPRAMS has not reached 70% response rate since Hurricane Katrina in 2005 and therefore data is unreliable. Furthermore, infants are between 2 and 6 months at the time of the survey, which may lend bias to the question of breastfeeding at six months.

2. Section Number: Form11_Performance Measure #11

Annual Objective and Performance Data 2010 2011 2012 2013 2014 25.5 26.5 26 27 **Annual Performance Objective**

Annual Indicator Future year objectives for state performance measures from needs assessment period 2006-2010 are Numerator view-only. If you are continuing any of these measures in the new needs assessment period, you may Denominator establish objectives for those measures on Form 11 for the new needs assessment period.

Field Level Notes

1. Section Number: Form11_State Performance Measure #2

Field Name: SM2 Row Name: Column Name: Year: 2009 Field Note:

The numerator this year, number of women in need of publicly funded family planning services who have received such services in a calendar year an includes Family Planning Program Annual Report (FPAR), Medicaid and Family Planning Take Charge Medicaid Waiver. In order to achieve an unduplicated count, Medicaid data was subtracted from FPAR data which revealed the number of non-publicly funded women. The new numerator included FPAR data and the non-publicly funded women who were prescribed oral contraceptives, IUDs, or tubal ligation/surgical procedure. Women included in the FPAR data are not included in Medicaid data. Medicaid data include number of women not included in the Medicaid waiver. Family Planning Take Charge Medicaid Waiver provides data on all women between the ages of 19-44 that receive services covered by the Waiver. Prior year's data only included FPAR data.

Section Number: Form11_State Performance Measure #2

Field Name: SM2 **Row Name:** Column Name: Year: 2008 Field Note:

Data is for the calendar year.

Section Number: Form11_State Performance Measure #2

FORM 12 TRACKING HEALTH OUTCOME MEASURES [SECS 505 (A)(2)(B)(III) AND 506 (A)(2)(A)(III)] STATE: LA

Form Level Notes for Form 12

CHARACTERISTICS DOCUMENTING FAMILY PARTICIPATION IN CSHCN PROGRAMS STATE: LA 1. Family members participate on advisory committee or task forces and are offering training, mentoring, and reimbursement, when appropriate. 3 2. Financial support (financial grants, technical assistance, travel, and child care) is offered for parent activities or parent groups. 2 3. Family members are involved in the Children with Special Health Care Needs elements of the MCH Block Grant Application process. 3 4. Family members are involved in service training of CSHCN staff and providers. 3 5. Family members hired as paid staff or consultants to the State CSHCN program (a family member is hired for his or her expertise as a family member). 3 6. Family members of diverse cultures are involved in all of the above activities. 3 Total Score: 17 Rating Key 0 = Not Met 1 = Partially Met 2 = Mostly Met 3 = Completely Met

FORM NOTES FOR FORM 13

None

FIELD LEVEL NOTES

1. Section Number: Form13_Main

Field Name: Question1

Row Name: #1. Family members participate on advisory committee or task forces...

Column Name: Year: 2011 Field Note:

All 9 CSHS Parent Liaisons have the opportunity to serve on various community/ regional task forces. All receive 16 hours of training each year and are paid for their time and reimbursed for training expenses.

2. Section Number: Form13_Main

Field Name: Question2

Row Name: #2. Financial support (...) is offered for parent activities or parent groups.

Column Name: Year: 2011 Field Note:

Most of the contracting agencies employing parent liaisons receive small stipends to help offset family costs to participate in activities in addition to the compensation for parents' time. However, more is always needed in the agencies that offer stipends for things such as child care, or to offset fuel cost.

3. Section Number: Form13 Main

Field Name: Question3

Row Name: #3. Family members are involved in the Children with Special Health Care Needs...

Column Name: Year: 2011 Field Note:

MCH Block Grant information is sent to parent liaisons, who in turn send it to parents in each region asking for feedback which is reported in the public input section. Statewide parent consultants also participate in the grant writing (such as this section).

4. Section Number: Form13_Main

Field Name: Question4

Row Name: #4. Family members are involved in service training of CSHCN staff and providers.

Column Name: Year: 2011 Field Note:

Family members are incorporated into every aspect of CSHS activities, including training. A parent liaison has been actively involved in care coordination. Parent liaisons participated in the CSHS Manual Revision Workgroup Meeting.

5. Section Number: Form13_Main

Field Name: Question5

Row Name: #5. Family members hired as paid staff or consultants to the State CSHCN program...

Column Name: Year: 2011 Field Note:

There are three full time statewide parent consultants that participate in CSHS programs: two in CSHS clinics and one with the Hearing, Speech and Vision Program. CSHS provides training for the 13 PL.

6. Section Number: Form13_Main

Field Name: Question6

Row Name: #6. Family members of diverse cultures are involved in all of the above activities

Column Name: Year: 2011 Field Note:

Louisiana is a culturally diverse state, and parent liaisons reflect this. Regional differences must continually be taken into consideration in the implementation of programs.

FORM 14 LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: LA FY: 2011

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase ,list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

- 1. Decrease infant mortality through reduction of preterm births in the African American population.
- 2. Decrease intentional and unintentional injuries in the maternal, child, adolescent, and CYSHCN populations.
- Improve preconception and interconception health among Louisiana women.
- 4. Reduce unintended pregnancies and reduce births spaced at less than 24 months apart.
- 5. Increase care coordination for CYSHCN and their families.
- 6. Improve the nutritional health of the maternal and child population with a focus on obesity prevention and breastfeeding.
- 7. Assure that strategies and methods in MCH and CYSHCN programs are culturally competent to reduce racial disparities.
- 8. Improve oral health of MCH and CYSHCN population by increasing access to preventive measures and access to oral health care.
- 9. Improve the behavioral health of the MCH and CYSHCN population through prevention, early intervention, screening, referral, and treatment, where appropriate.
- 10. Increase preventive services for adolescents and transition services for youth with special health care needs (YSHCN).

FIELD LEVEL NOTES

FORM 16 STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET STATE: LA

SP(Reporting Year) #____

Percent of all children and adolescents enrolled in public schools in Louisiana that have access to school-based health PERFORMANCE MEASURE:

STATUS: Active

GOAL To offer access to comprehensive preventive and primary health services, including mental health services, to children

and adolescents enrolled in public schools in Louisiana.

DEFINITION Number of children and adolescents enrolled in public schools in Louisiana that have access to school-based health

center services / Number of children and adolescents enrolled in Louisiana public schools

Number of children and adolescents enrolled in public schools in Louisiana that have access to school-based health

center services Denominator:

Number of children and adolescents enrolled in Louisiana public schools

Units: 100 Text: 1

HEALTHY PEOPLE 2010 OBJECTIVE 21.2 Receipt of recommended services

Increase to at least 50% the proportion of adolescents, and to at least 80% the proportion of children age 2-12, who have

received, as a minimum within the appropriate interval, all of the screening and immunization services and at least one of

the counseling services appropriate for their age.

Adolescent School Health Initiative Annual Services Report. Louisiana Department of Education. Increasing the percent of **DATA SOURCES AND DATA ISSUES**

all children and adolescents enrolled in public schools in Louisiana that have access to school-based health center

services will depend on substantial financial support for school-based health centers.

SIGNIFICANCE According to the 1996 Annie Casey Foundation Kids Count Data Book, Louisiana ranks last in the nation for the manner in which it provides health and quality care for its children. School-based health centers provide convenient access to

primary and preventive care for children and adolescents who might otherwise have limited or no access to health care.

SP(Reporting Year) #_____2

PERFORMANCE MEASURE: Percent of women in need of family planning services who have received such services.

STATUS:

Active

GOAL To increase the percent of women in need of family planning services who have received such services through publicly

supported clinics.

DEFINITIONThe number of women in need of family planning services who have received such services from a publicly supported clinic in a calendar year. The number of women in need of family planning services in a calendar year.

in a calendar year. The number of women in need of family planning services in a calendar year.

Numerator

The number of women in need of family planning services who have received such services from a publicly supported clinic in a calendar year.

Denominator:

The number of women in need of family planning services in a calendar year.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 5.2 Unintended pregnancy

Reduce to no more than 30% the proportion of all pregnancies that are unintended.

Data Sources and Data Issues

Family planning program data. The Alan Guttmacher Institute report on Contraceptive Needs and Services estimates the need for publicly funded services for women between the ages of 13 and 44 years who are sexually active, and are neither

intentionally pregnant nor trying to become pregnant.

SIGNIFICANCE In the United States, only half of pregnancies are planned at the time of conception. For some of these unplanned

pregnancies, the women wanted to get pregnant later; for others, the women wanted no more children at all. About half of unplanned pregnancies are also associated with more problems for the mother and infant than planned pregnancies. Women with unplanned pregnancies cannot take advantage of preconception care, a special health care visit that helps women achieve the healthiest possible pregnancy outcome. Planning to become pregnant at a time when a woman is

healthy and ready to become a parent can maximize the health and opportunities for women, children, and families, and can

reduce abortions.

SP(Reporting Year) #_____3

PERFORMANCE MEASURE: Rate of children (per 1,000) under 18 who have been abused or neglected.

STATUS: Active

GOAL To prevent child abuse and neglect.

DEFINITION # of validated cases of child abuse and neglect to children under age 18 in Louisiana / Total population under age 18 in

Louisiana

Numerator:

Number of validated cases of child abuse and neglect to children under age 18 in Louisiana

Denominator:

Total population under 18 in Louisiana

Units: 1000 Text: Rate

HEALTHY PEOPLE 2010 OBJECTIVE 7.4 Child abuse and neglect

Reverse to less that 25.2 per 1000 children the rising incidence of maltreatment of children younger than age 18. (Baseline

25.2 per 1000 in 1986)

DATA SOURCES AND DATA ISSUES Numerator is from State of Louisiana, Department of Social Services, Office of Community Services. Valid cases, as defined

by OCS, mean that a review of the facts showed a reason to believe abuse had taken place. Denominator is from U.S. Bureau of the Census population estimates. The number of reported cases of child abuse and neglect is much higher than the validated cases. For instance, for fiscal year 1996 the numbers were 45,981 reported cases vs. 14,863 validated cases. It is difficult to project five year goals for this measure, since as awareness of child abuse and neglect is heightened,

numbers of reported and validated cases may actually increase.

SIGNIFICANCE Children who witness or are victims of violence at home display emotional and behavioral disturbance as diverse as

withdrawal, low self-esteem, nightmares, self-blame, and aggression against peers, family members and/or property. A comparison of delinquent and nondelinquent youth found that a history of family violence or abuse is the most significant

difference between the two groups.

SP(Reporting Year) #_____4

PERFORMANCE MEASURE: Percent of CSHS patients with case management (follow-up visits) from a nurse, social worker, or nutritionist.

STATUS: Active

Goal To ensure that a coordinated continuum of appropriate services exist for the care of children with potential or actual chronic

and disabling conditions and their families.

DEFINITIONUnduplicated count of CSHS patients with a follow-up visit / Unduplicated count of CSHS patients

Numerator:

Unduplicated count of CSHS patients with a follow-up visit

Denominator:

Unduplicated count of CSHS patients

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 17.2 Disability due to chronic conditions

Reduce to no more than 8% the proportion of people who experience a limitation in major activity due to chronic conditions.

DATA SOURCES AND DATA ISSUES

A new Ph-9 form collecting more accurate information on follow-up visits for CSHS patients has just been implemented in three regions, and all regions will eventually adopt the new form. In five years, it is expected that 60% of CSHS patients will

have received case management services, since Louisiana's CSHS program is placing increasing emphasis on a more holistic approach. The program envisions increased case management for its children, and a shift away from simple direct

medical intervention.

SIGNIFICANCE

The establishment of systems of services that reflect the principles of comprehensive, community-based, coordinated, family-centered care are essential for effectively fostering and facilitating activities to (1) reverse of slow the progress of

family-centered care are essential for effectively fostering and facilitating activities to (1) reverse of slow the progress of chronic and disabling conditions among children; (2) minimize the complications and impact of chronic disabling conditions among children; (3) strengthen the ability of families to care for children with actual or potential chronic and disabling conditions; and (4) enable children with more serious conditions to remain in the home and community-based living

arrangements, rather than in institutional settings.

Page 73 of 139

SP(Reporting Year) #

SIGNIFICANCE

PERFORMANCE MEASURE: Percent of women who use alcohol during pregnancy.

STATUS: Active

GOAL To reduce alcohol use during pregnancy.

DEFINITION # of women surveyed who report they have used alcohol during the last 3 months of their most recent pregnancy / # of

women surveyed

Numerator:

of women surveyed who report they have used alcohol during the last 3 months of their most recent pregnancy

Denominator:

of women surveyed Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 14.10 Alcohol, tobacco, and drug use during pregnancy

Increase abstinence from tobacco use by pregnant women to at least 90%, increase abstinence from alcohol by pregnant women to at least 90%, and increase abstinence from cocaine and marijuana by pregnant women to at least 90%.

Initially, the data was taken from birth certificate data, which resulted in a low estimate due to the known limitations of birth **DATA SOURCES AND DATA ISSUES**

certificate data. Data from LaPRAMS, Louisiana's Pregnancy Risk Assessment Monitoring System, is now used and is a

more accurate data source for this measure.

Substance use during pregnancy contributes significantly to the number of low birth weight babies and the infant mortality

and morbidity rates in Louisiana.

SP(Reporting Year) #_

PERFORMANCE MEASURE: Rate of infant deaths due to Sudden Infant Death Syndrome.

STATUS: Active

GOAL To decrease the rate of infant deaths due to Sudden Infant Death.

DEFINITION Number of infant deaths due to SIDS in a calendar year/ Number of live births

Numerator: Number of infant deaths due to SIDS in a calendar year

Denominator: Number of live births Units: 1000 Text: Rate

16-1: Reduce Fetal and Infant Deaths **HEALTHY PEOPLE 2010 OBJECTIVE**

DATA SOURCES AND DATA ISSUES SIDS Program Data(numerator), Vital Statistics Mortality Data (denominator)

SIGNIFICANCE SIDS is the number one cause of unexpected infant death. SIDS is the most common cause of death in the post-neonatal period. The U.S. SIDS rate has declined almost 50% since the initiation of the "Back to Sleep Campaign" in 1994. However, there is still significant racial disparity. Rates are much higher in lower social economic status (SES) groups across all

populations.

SP(Reporting Year) #_____9

PERFORMANCE MEASURE: Percent of state fetal and infant deaths reviewed by a Feto-Infant Mortality Review (FIMR).

STATUS: Active

GOAL To

To monitor and evaluate the progress of the Louisiana FIMR Network by measuring the percent of fetal and infant deaths to Louisiana residents that are reviewed by these programs. The goal is to have FIMR case reviews for 20% of the fetal and

infant deaths in Louisiana within the next five years (2011).

DEFINITIONThe percent of fetal and infant deaths with a birth weight greater than 500gms and/or gestational age larger than 24 weeks,

born to Louisiana residents, that are reviewed by a Louisiana FIMR program.

Numerator:

The number of fetal and infant deaths of Louisiana residents weighing 500 or more grams and/or 24 or more weeks gestation, as determined by Louisiana Vital Records, that are reviewed by a Louisiana FIMR program in a calendar year.

Denominator:

The number of fetal and infant deaths of Louisiana residents weighing 500 or more grams and/or 24 or more weeks

gestation in a calendar year, as determined by Louisiana Vital Records.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 16-1: Reduce Fetal and Infant Deaths

DATA SOURCES AND DATA ISSUES

Each of the 9 regions in Louisiana has a FIMR program whose coordinator is responsible for reporting the number of cases reviewed at each meeting. Vital Records birth and death data, the denominator for this measure, is not typically available

until the following summer after each calendar year. Therefore, calculation of this measure will use the latest available vital

records data.

SIGNIFICANCE

Through this process of case identification, data abstraction, and case review, FIMR programs will assure further enhanced understanding of the circumstances surrounding fetal and infant deaths in Louisiana. Quantitatively monitoring a qualitative

program helps to bring together data and program specialists for improved outcomes.

SP(Reporting Year) #____11

SIGNIFICANCE

PERFORMANCE MEASURE: Percent of Louisiana resident women giving birth who undergo screening for substance use, depression, and domestic

violence using the SBIRT-HBE approved methods.

STATUS:

Goal To provide a screening system to detect pregnant women at risk for substance use, depression and domestic violence, refer

for prevention and early intervention services and to provide data to document the need for services to address this

problem.

DEFINITION Percent of Louisiana resident women giving birth who undergo screening for substance use, depression, and domestic

violence using the SBIRT-HBE approved methods.

Numerator:

Number of women who undergo at least one screen during pregnancy.

Denominator:

Number of Louisiana resident women giving birth within the year.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 18-6

(Developmental) Increase the number of persons seen in primary health care who receive mental health screening and

ssessment

DATA SOURCES AND DATA ISSUES

Numerator is the number of Louisiana pregnant women who are screened through SBIRT-HBI approved methods

Denominator is number of Louisiana resident women giving birth within the year. Data source for numerator is actual

number of screens performed. Denominator is vital records for deliveries.

Risk screening will be prioritized to pregnant women in order to provide opportunities for intervention before the child is

born. Identifying such women at the prenatal level, with referral for appropriate services, will promote greater awareness of problems such as substance use, maternal depression and the effects of domestic violence on children, and opportunities

for preventive or intervention services for such families.

FORM 17

HEALTH SYSTEMS CAPACITY INDICATORS FORMS FOR HSCI 01 THROUGH 04, 07 & 08 - MULTI-YEAR DATA STATE: LA

Form Level Notes for Form 17

None

HEALTH SYSTEMS CAPACITY MEASURE # 01

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	Annual Indicator Data				
	2005	2006	2007	2008	2009
Annual Indicator	60.3	57.1	55.3	55.3	55.3
Numerator	1,817	1,722	1,650	1,650	1,650
Denominator	301,375	301,375	298,157	298,157	298,157
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied. (Explain data in a year note. See Guidance, Appendix IX.)

1. Section Number: Form17_Health Systems Capacity Indicator #01

Field Name: HSC01 Row Name: Column Name: Year: 2009 Field Note:

Data is preliminary and based upon the 2008 data.

2. Section Number: Form17_Health Systems Capacity Indicator #01

Field Name: HSC01 Row Name: Column Name: Year: 2008 Field Note:

Data is preliminary and based upon 2007 data.

3. Section Number: Form17_Health Systems Capacity Indicator #01

Field Name: HSC01 Row Name: Column Name: Year: 2007 Field Note:

Data is final and is based upon 2007 Louisiana Hospital Inpatient Discharge Data (LAHIDD). Since 2002, the primary data source of analysis and reporting for this indicator is the Louisiana Hospital Inpatient Discharge Data (LAHIDD). LAHIDD is compiled by the Health Statistics Department of the Louisiana Office of Public Health, and Injury Research and Prevention Program analyzes the data needed for this indicator. Since participation in reporting hospital inpatient discharge data is not mandatory in Louisiana, then differences in the number, size, and type of hospitals reporting annually will affect our data reported. The variability limits year-to-year comparison analyses.

HEALTH SYSTEMS CAPACITY MEASURE # 02

1. Section Number: Form17_Health Systems Capacity Indicator #07A

Field Name: HSC07A Row Name: Column Name: Year: 2009 Field Note:

NOTE: For 2005-2008, data was obtained from the Louisiana Medicaid Program. The numerator is the (unduplicated) number of Medicaid recipient children under age 19 years who received a medical service during the respective FFY, by date of service, in which CommunityCARE administrative fees are not considered paid claims. The denominator is the number of children enrolled in Louisiana CommunityCare (Medicaid/LaCHIP), eligible for services. Retroactive eligibility is included in reporting these figures.

2. Section Number: Form17_Health Systems Capacity Indicator #07A

Field Name: HSC07A Row Name: Column Name: Year: 2008 Field Note:

For 2008, data was obtained from the Louisiana Department of Health and Hospitals Medicaid Annual Reports for Federal Fiscal Year 2007/2008. The numerator is the (unduplicated) number of all Medicaid children (Title XIX and XXI) under age 19 years who received at least one processed claim during the period involved, whether or not he/she was enrolled on the date the claim was paid but was enrolled at the time the service for the claim was provided. The denominator is the number of all children who applied and have been approved to receive services, regardless of whether he/she received services and/or any claims have been filed on his/her behalf. Therefore, any post-annual report data of all Medicaid children's enrollment, recipients of service(s), and/or total costs of received services received for a specific state fiscal year, which is obtained after the date used for the Medicaid report, will differ from the data in the report because retroactive eligibility will be included in the new figures.

3. Section Number: Form17_Health Systems Capacity Indicator #07A

Field Name: HSC07A Row Name: Column Name: Year: 2007 Field Note:

For 2006 and 2007, data was obtained from the Louisiana Department of Health and Hospitals Medicaid Annual Reports for State Fiscal Year 2005/2006 and 2006/2007. The numerator is the (unduplicated) number of all Medicaid children (Title XIX and XXI) under age 19 years who received at least one processed claim during the period involved, whether or not he/she was enrolled on the date the claim was paid but was enrolled at the time the service for the claim was provided. The denominator is the number of all children who applied and have been approved to receive services, regardless of whether he/she received services and/or any claims have been filed on his/her behalf. Therefore, any post-annual report data of all Medicaid children's enrollment, recipients of service(s), and/or total costs of received services received for a specific state fiscal year, which is obtained after the date of the data used for the Medicaid report, will differ from the data in the report because retroactive eligibility will be included in the new figures.

HEALTH SYSTEMS CAPACITY MEASURE # 07B					
The percent of EPSDT eligible children aged 6 through 9 years who h	ave received any de	ental services during t	the year.		
			Annual Indicator Da	ata	
	2005	2006	2007	2008	2009
Annual Indicator	42.0	40.2	40.4	44.5	51.9
Numerator	62,777	58,224	62,241	66,807	80,319
Denominator	149,564	144,751	153,948	150,115	154,801
Check this box if you cannot report the numerator because 1. There are fewer than 5 events over the last year, and 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied. (Explain data in a year note. See Guidance, Appendix IX. Is the Data Provisional or Final?				Final	Final

Pregnant women are covered under the state's LaMOMS program. This program is a standard Medicaid program and is not covered by SCHIP funds.

FORM 19 HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM STATE: LA

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Informatioin)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	Yes
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	3	Yes
REGISTRIES AND SURVEYS Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	2	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

- 1 = No, the MCH agency does not have this ability.
 2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
 3 = Yes, the MCH agency always has this ability.

FORM 19 HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM STATE: LA

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	1	No
Other: Caring Community Youth Survey (CCYS)	3	Yes

*Where: 1 = No

- 2 = Yes, the State participates but the sample size is <u>not</u> large enough for valid statewide estimates for this age group. 3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

1. Section Number: Form20_Health Status Indicator #04C

Field Name: HSI04C Row Name: Column Name: Year: 2009 Field Note:

Data is provisional, and based on 2007. Since 2002, the primary data source of analysis and reporting for this indicator is the Louisiana Hospital Inpatient Discharge Data (LAHIDD). LAHIDD is compiled by the Health Statistics Department of the Louisiana Office of Public Health, and EMS/Injury Research and Prevention Program analyzes the data needed for this indicator. Since participation in reporting hospital inpatient discharge data is not mandatory in Louisiana, then differences in the number, size, and type of hospitals reporting annually will affect our data reported. This variability limits year-to-year comparison analyses.

2. Section Number: Form20_Health Status Indicator #04C

Field Name: HSI04C Row Name: Column Name: Year: 2008 Field Note:

Data is provisional, and based on 2007. Since 2002, the primary data source of analysis and reporting for this indicator is the Louisiana Hospital Inpatient Discharge Data (LAHIDD). 13. Section Number: Form21_Indicator 09A **Field Name:** HSIRace_SingleParentPercent

Row Name: Percent in household headed by single parent

Column Name: Year: 2011 Field Note:

Definitions: Children under age 18 who live with their own single parent either in a family or subfamily. In this definition, single-parent families may include cohabiting

couples and do not include children living with married stepparents.

Data Source: Population Reference Bureau, analysis of data from the U.S. Census Bureau, Census 2000 Supplementary Survey, 2001 Supplementary Survey, 2002

through 2008 American Community Survey.

Updated September 2009. The data for this measure come from the 2000 and 2001 Supplementary Survey and the 2002 through 2008 American Community Survey (ACS). The 2000 through 2004 ACS surveyed approximately 700,000 households monthly during each calendar year. In general but particularly for these years, use caution when interpreting estimates for less populous states or indicators representing small subpopulations, where the sample size is relatively small. Beginning in January 2005, the U.S. Census Bureau expanded the ACS sample to 3 million households (full implementation), and in January 2006 the ACS included group quarters. The ACS, fully implemented, is designed to provide annually updated social, economic, and housing data for states and communities. (Such local-area data have traditionally been collected once every ten years in the long form of the decennial census.)

Single-parent families may include cohabiting couples and do not include children living with stepparents. Children who live in group quarters (for example, institutions, dormitories, or group homes) are not included in this calculation. Children in single-parent families.

Data Provided by: National KIDS COUNT Program

14. Section Number: Form21_Indicator 09A Field Name: HSIRace_TANFPercent Row Name: Percent in TANF (Grant) families

Column Name: Year: 2011 Field Note:

Percent: The average number of children served by the Family Independence Temporary Assistance Program (FITAP) in a state fiscal year (July 1-June 30) per 100

children

Data Source: FITAP Numbers: Louisiana Department of Social Services, Office of Family Support, Quality Assurance Division. Population Data: Population Estimates Program, Population Division, U.S. Census Bureau Washington D.C. Release Date: August 7, 2008. Available at http://www.census.gov/popest/estimates.php Footnotes: FITAP provides cash assistance to families with children when the financial resources of the family are insufficient to meet subsistence needs. The average family consists of a mother and two children. The average grant in Louisiana is \$200 per month.

Because FITAP data are based on state fiscal year averages, population estimates for two years were averaged to calculate a FITAP participation rate per 100 children.

LNE (Low Number Event) is a value of fewer than 5 events or a rate based on fewer than 20 events and is thus not reported.

Data Provided by: Agenda for Children

 Section Number: Form21_Indicator 09A Field Name: HSIRace_MedicaidNo Row Name: Number enrolled in Medicaid

17. Section Number: Form21_Indicator 09A Field Name: HSIRace_FoodStampNo

Row Name: Number enrolled in food stamp program

Column Name: Year: 2011 Field Note:

The average number of children served by the Food Stamp program in a given state fiscal year (July 1-June 30).

Data Source: Food Stamp data: Louisiana Department of Social Services, Office of Family Support, Quality Assurance Division. No further ethnic or racial greakdown is available.

 Section Number: Form21_Indicator 09A Field Name: HSIRace_WICNo Row Name: Number enrolled in WIC

Column Name: Year: 2011 Field Note:

Data is for FFY 2009. The number was derived by adding the number of infants and children that participated in the reporting year, based on the average number of vouchers. This was found to be more accurate versus using unique identifiers. Past counts of unique identifiers included children later found to be ineligible or duplicates.

The racial and ethnic breakdown were derived from the PHAME Report. Information based upon Race/Idenity as entered into PHAME. This was used to pull a percentage of race and apply to the actual participation numbers. The participation numbers are not unique pass ID's, they reflect the actual number of people served (holding WIC benefits).

Row Name: Rate (per 100,000) of juvenile crime arrests

Column Name: Year: 2011 Field Note:

Section Number: Form21_Indicator 12

Field Name: S12_50percent

Row Name: Percent Below: 50% of poverty

Column Name: Year: 2011 Field Note:

Definitions: The share of children under age 18 who live in families with incomes less than 50 percent of the federal poverty level, as defined by the U.S. Office of Management and Budget.

Data Source: Population Reference Bureau, analysis of data from the U.S. Census Bureau, Census 2000 Supplementary Survey, 2001 Supplementary Survey, 2002 through 2008 American Community Survey. Updated October 2009.

The data for this measure come from the 2000 and 2001 Supplementary Survey and the 2002 through 2008 American Community Survey (ACS). The 2000 through 2004 ACS surveyed approximately 700,000 households monthly during each calendar year. In general but particularly for these years, use caution when interpreting estimates for less populous states or indicators representing small subpopulations, where the sample size is relatively small. Beginning in January 2005, the U.S. Census Bureau expanded the ACS sample to 3 million households (full implementation), and in January 2006 the ACS included group quarters. The ACS, fully implemented, is designed to provide annually updated social, economic, and housing data for states and communities. (Such local-area data have traditionally been collected once every ten years in the long form of the decennial census.)

The federal poverty definition consists of a series of thresholds based on family size and composition. In 2000, a 50% poverty threshold for a family of two adults and two children was \$8,731. Poverty status is not determined for people in military barracks, institutional quarters, or for unrelated individuals under age 15 (such as foster

children). Children in extreme poverty.

The data for this measure come from the 2000 and 2001 Supplementary Survey and the 2002 through 2008 American Community Survey (ACS). The 2000 through 2004 ACS surveyed approximately 700,000 households monthly during each calendar year. In general but particularly for these years, use caution when interpreting estimates for less populous states or indicators representing small subpopulations, where the sample size is relatively small. Beginning in January 2005, the U.S. Census Bureau expanded the ACS sample to 3 million households (full implementation), and in January 2006 the ACS included group quarters. The ACS, fully implemented, is designed to provide annually updated social, economic, and housing data for states and communities. (Such local-area data have traditionally been collected once every ten years in the long form of the decennial census.)

The federal poverty definition consists of a series of thresholds based on family size and composition. In 2000, a 150% poverty threshold for a family of two adults and two children was \$26,195. Poverty status is not determined for people in military barracks, institutional quarters, or for unrelated individuals under age 15 (such as foster children). Children below 150% poverty.

30. Section Number: Form21_Indicator 12

Field Name: S12_200percent Row Name: 200% of poverty

Column Name: Year: 2011 Field Note:

Definitions: The share of children under age 18 who live in families with incomes less than 200 percent of the federal poverty level, as defined by the U.S. Office of Management and Budget. Data Source: Population Reference Bureau, analysis of data from the U.S. Census Bureau, Census Supplementary Surveys and American Community Survey. Updated October 2009.

S - Estimates suppressed when the confidence interval around the percentage is greater than 10 percentage points. N.A. – Data not available. A 90 percent confidence interval for each estimate can be found at Children below 200% poverty.

FORM 12 TRACKING HEALTH OUTCOME MEASURES [SECS 505 (A)(2)(B)(III) AND 506 (A)(2)(A)(III)] STATE: LA

Form Level Notes for Form 12

FORM 16 STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET STATE: LA

SP(New for Needs Assessment cycle 2011-2015) #

Percent of all children and adolescents enrolled in public schools in Louisiana that have access to school-based health PERFORMANCE MEASURE:

STATUS: Active

GOAL To offer access to comprehensive preventive and primary health services, including mental health services, to children

and adolescents enrolled in public schools in Louisiana.

DEFINITION Number of children and adolescents enrolled in public schools in Louisiana that have access to school-based health

center services / Number of children and adolescents enrolled in Louisiana public schools

Number of children and adolescents enrolled in public schools in Louisiana that have access to school-based health

center services Denominator:

Number of children and adolescents enrolled in Louisiana public schools

Units: 100 Text: 1

HEALTHY PEOPLE 2010 OBJECTIVE 21.2 Receipt of recommended services

Increase to at least 50% the proportion of adolescents, and to at least 80% the proportion of children age 2-12, who have received, as a minimum within the appropriate interval, all of the screening and immunization services and at least one of

the counseling services appropriate for their age.

Adolescent School Health Initiative Annual Services Report. Louisiana Department of Education. Increasing the percent of **DATA SOURCES AND DATA ISSUES**

all children and adolescents enrolled in public schools in Louisiana that have access to school-based health center

services will depend on substantial financial support for school-based health centers.

SIGNIFICANCE According to the 1996 Annie Casey Foundation Kids Count Data Book, Louisiana ranks last in the nation for the manner in which it provides health and quality care for its children. School-based health centers provide convenient access to

primary and preventive care for children and adolescents who might otherwise have limited or no access to health care.

PERFORMANCE MEASURE: Percent of unintended pregnancies among women who had a live birth.

STATUS: Ac

GOAL To decrease the percent of unintended pregnancies among women who have had a live birth.

DEFINITIONNumber of women having a live birth in Louisiana that reported that the pregnancy was unintended/number of women

having a live birth in Louisiana.

Numerator

Number of women surveyed who wanted to become pregnant later or did not want to become pregnant then or at any time

in the future, weighted to represent all women having a live birth in Louisiana in a calendar year.

Denominator:

Number of women surveyed, weighted to represent all women having a live birth in Louisiana in a calendar year.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 9-1 Increase the proportion of pregnancies that are intended

Increase to at least 70% the proportion of pregnancies that are intended.

Data Sources and Data Issues

Louisiana Pregnancy Risk Assessment Monitoring System (LaPRAMS). Data only includes women who have had a live birth, so does not represent any pregnancies that resulted in termination. PRAMS data relies on maternal self-report.

PRAMS data is weighted to represent all women having a live birth in Louisiana in a calendar year.

SIGNIFICANCE In the United States, only half of pregnancies are planned at the time of conception. For some of these unplanned

pregnancies, the women wanted to get pregnant later; for others, the women wanted no more children at all. About half of unplanned pregnancies are also associated with more problems for the mother and infant than planned pregnancies. Women with unplanned pregnancies cannot take advantage of preconception care, a special health care visit that helps women achieve the healthiest possible pregnancy outcome. Planning to become pregnant at a time when a woman is healthy and ready to become a parent can maximize the health and opportunities for women, children, and families, and can

reduce abortions.

Page 130 of 139

PERFORMANCE MEASURE: Rate of children (per 1,000) under 18 who have been abused or neglected.

STATUS: Active

GOAL To prevent child abuse and neglect.

DEFINITION # of validated cases of child abuse and neglect to children under age 18 in Louisiana / Total population under age 18 in

ouisiana.

Numerator:

Number of validated cases of child abuse and neglect to children under age 18 in Louisiana

Denominator:

Total population under 18 in Louisiana

Units: 1000 Text: Rate

HEALTHY PEOPLE 2010 OBJECTIVE 7.4 Child abuse and neglect

Reverse to less that 25.2 per 1000 children the rising incidence of maltreatment of children younger than age 18. (Baseline

25.2 per 1000 in 1986)

DATA SOURCES AND DATA ISSUES

Numerator is from State of Louisiana, Department of Social Services, Office of Community Services. Valid cases, as defined

by OCS, mean that a review of the facts showed a reason to believe abuse had taken place. Denominator is from U.S. Bureau of the Census population estimates. The number of reported cases of child abuse and neglect is much higher than the validated cases. For instance, for fiscal year 1996 the numbers were 45,981 reported cases vs. 14,863 validated cases. It is difficult to project five year goals for this measure, since as awareness of child abuse and neglect is heightened,

numbers of reported and validated cases may actually increase.

SIGNIFICANCE Children who witness or are victims of violence at home display emotional and behavioral disturbance as diverse as

withdrawal, low self-esteem, nightmares, self-blame, and aggression against peers, family members and/or property. A comparison of delinquent and nondelinquent youth found that a history of family violence or abuse is the most significant

difference between the two groups.

4

PERFORMANCE MEASURE:

The difference in the percent of publically insured and percent of privately insured CYSHCN in Louisiana who need more

care coordination services.

STATUS:

GOAL

To reduce the disparity between publically and privately insured CYSHCN in Louisiana who report they need more care coordination services.

DEFINITION

The difference between the percent of publically insured and percent of privately insured CYSHCN in Louisiana whose families reported that in the past 12 months they could have used extra help arranging or coordinating their care among different health care providers or services. Stratification: Insurance Type

Weighted number of the CYSHCN in Louisiana whose families reported that in the past 12 months they could have used extra help arranging or coordinating their care among different health care providers or services.

Denominator:

Weighted number of the CYSHCN population in Louisiana.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16.23 Increase the proportion of Territories and States that have service systems for children with Increase care coordination capacity by 11% among public health and social service state agencies to decrease the disparity in need for more care coordination between publically (22%) and privately (11%) insured CYSHCN.

DATA SOURCES AND DATA ISSUES

2005-2006 National Survey of Children with Special Health Care Needs (NS-CSHCN). Provides prevalence estimates with high precision for health, social, educational, and service system use characteristics for the CYSHCN population, both

nationally and state specific.

SIGNIFICANCE

Quality comprehensive care coordination is a significant component of the American Academy of Pediatrics' (AAP) definition of the Medical Home. Care Coordination has been shown to reduce health care system inefficiencies related to duplication of services, time, money, and burden on the family. Care Coordination increases the likelihood of receiving the needed services in a timely manner, enables the family to more easily navigate the service system, and helps to ensure that health condition management is comprehensive and continuous. Such services reduce the risk for sequelae and/or Disability-Adjusted Life Years (DALYs).

PERFORMANCE MEASURE: Percent of singleton live births delivered at 34-36 weeks gestation.

5

STATUS: Active

SIGNIFICANCE

GOAL To decrease the percent of Louisiana resident singleton live births delivered at 34 to 36 completed weeks of gestation.

DEFINITIONNumber of singleton live births to Louisiana resident women delivered at 34-36 completed weeks gestation in a calendar

year / total number of singleton live births to Louisiana resident women in that same calendar year.

Numerator

The number of singleton live births to Louisiana resident women delivered at 34-36 weeks gestation in a calendar year.

Denominator:

The total number of singleton live births to Louisiana resident women delivered in a calendar year, irrespective of gestational age at delivery.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE 16-11b. Live births at 32-36 weeks of gestation.

Not measured directly. Closest objective is 16-11b. Live births at 32-36 weeks of gestation. Target is < 6.4%.

DATA SOURCES AND DATA ISSUES

Vital records birth certificates Gestational age may be measured by clinical estimate or date of last menstrual period (LMP).

For this measure, clinical estimate will be used when available and LMP will be used only if the clinical estimate is not

available

Late preterm infants (delivered 34-36 weeks gestation) are typically healthier than very preterm infants, but have elevated risks for potentially serious health problems when compared to term infants. The lungs and brain are among the last systems to fully mature during gestation, and complications can arise due to the immaturity. Complications among neonates delivered late preterm include temperature instability, feeding difficulties, breathing problems like respiratory distress syndrome (RDS) and transient tachypnea of the newborn (TTN) and jaundice. The infant mortality rate among late preterm infants (7.7 per 1,000 live births) is three times higher than the rate among term infants (2.5 per 1,000 live births). Much of these higher rates are due to complications necessitating early delivery, including some birth defects, rather than due to early delivery itself. Late preterm infants incur greater costs and longer lengths of stay in neonatal intensive care units

(NICU) and experience higher rates of re-hospitalization after neonatal discharge.

SP(New for Needs Assessment cycle 2011-2015) # 6 Percent of Louisiana resident women giving birth who undergo screening for substance use, depression, and domestic **PERFORMANCE MEASURE:** violence using the SBIRT-HBE approved methods. STATUS: To provide a screening system to detect pregnant women at risk for substance use, depression and domestic violence, refer GOAL for prevention and early intervention services and to provide data to document the need for services to address this **DEFINITION** Percent of Louisiana resident women giving birth who undergo screening for substance use, depression, and domestic violence using the SBIRT-HBE approved methods. Number of women who undergo at least one screen during pregnancy. Denominator: Number of Louisiana resident women giving birth within the year. Units: 100 Text: Percent **HEALTHY PEOPLE 2010 OBJECTIVE** 18-6 (Developmental) Increase the number of persons seen in primary health care who receive mental health screening and Numerator is the number of Louisiana pregnant women who are screened through SBIRT-HBI approved methods **DATA SOURCES AND DATA ISSUES** Denominator is number of Louisiana resident women giving birth within the year. Data source for numerator is actual

number of screens performed. Denominator is vital records for deliveries.

SIGNIFICANCE

Risk screening will be prioritized to pregnant women in order to provide opportunities for intervention before the child is born. Identifying such women at the prenatal level, with referral for appropriate services, will promote greater awareness of problems such as substance use, maternal depression and the effects of domestic violence on children, and opportunities for preventive or intervention services for such families.

SP(New for Needs Assessment cycle 2011-2015) # 7 PERFORMANCE MEASURE: Percent of women who use alcohol during pregnancy. STATUS: Active GOAL To reduce alcohol use during pregnancy. **DEFINITION** # of women surveyed who report they have used alcohol during the last 3 months of their most recent pregnancy / # of women surveyed Numerator: # of women surveyed who report they have used alcohol during the last 3 months of their most recent pregnancy Denominator: # of women surveyed Units: 100 Text: Percent **HEALTHY PEOPLE 2010 OBJECTIVE** 14.10 Alcohol, tobacco, and drug use during pregnancy Increase abstinence from tobacco use by pregnant women to at least 90%, increase abstinence from alcohol by pregnant

women to at least 90%, and increase abstinence from cocaine and marijuana by pregnant women to at least 90%.

Initially, the data was taken from birth certificate data, which resulted in a low estimate due to the known limitations of birth **DATA SOURCES AND DATA ISSUES**

certificate data. Data from LaPRAMS, Louisiana's Pregnancy Risk Assessment Monitoring System, is now used and is a

more accurate data source for this measure.

Substance use during pregnancy contributes significantly to the number of low birth weight babies and the infant mortality **SIGNIFICANCE**

and morbidity rates in Louisiana.

8 SP(New for Needs Assessment cycle 2011-2015) # PERFORMANCE MEASURE: Percent of African American women who most often lay their baby on his or her back to sleep. STATUS: Active GOAL Reduce the rate of SIDS and increase supine sleeping position amongst African American infants. Number of African American women who place their infants to sleep on their backs/African American women with living **DEFINITION** infants. Numerator: Number of African-American women surveyed who report placing their infant to sleep on his or her back most often, weighted to represent all African-American women having a live birth in Louisiana in a calendar year. Denominator: Number of African-American women surveyed, weighted to represent all African-American women having a live birth in the calendar year in Louisiana. Units: 100 Text: Percent **HEALTHY PEOPLE 2010 OBJECTIVE** 16-13 Increase the percentage of healthy, full-term infants who are placed to sleep on their backs Increase to 70% the percentage of healthy, full-term infants who are placed to sleep on their backs all of the time.

decrease the risk of SIDS.

Louisiana Pregnancy Risk Assessment Monitoring System (LaPRAMS) PRAMS data relies on maternal self-report.

There continues to be a disparity between SIDS rates by race, both at the national level and in Louisiana, with African

Americans more likely to die from SIDS than Caucasians. Placing an infant to sleep in a supine position has shown to

DATA SOURCES AND DATA ISSUES

SIGNIFICANCE

SP(New for Needs Assessment cycle 2011-2015) # 9 Percent of women having a live birth who visited a healthcare worker to be checked for high blood pressure during the 12 **PERFORMANCE MEASURE:** months before pregnancy. STATUS: To increase the percent of women having a live birth who visited a healthcare worker to be checked for high blood pressure GOAL during the 12 months prior to pregnancy. Health promotion through high blood pressure screening will help to enable women to enter pregnancy in optimal health. **DEFINITION** Number of women in Louisiana who have had a live birth who visited a healthcare worker to be treated or checked for high blood pressure in the 12 months prior to pregnancy. Number of women surveyed who report having visited a healthcare worker to be checked or treated for high blood pressure during the 12 months before pregnancy, weighted to represent all women having a live birth in Louisiana in a calendar year. Number of women surveyed, weighted to represent all women having a live birth in Louisiana in a calendar year. Units: 100 Text: Percent **HEALTHY PEOPLE 2010 OBJECTIVE**

whether their blood pressure was normal or high.

DATA SOURCES AND DATA ISSUES

SIGNIFICANCE

Louisiana Pregnancy Risk Assessment Monitoring System (LaPRAMS) PRAMS data relies on maternal self-report.

When high blood pressure has been present for some time before pregnancy, it is known as chronic hypertension. This condition remains during pregnancy and after the birth of the baby. It is vital that chronic hypertension be controlled because it can lead to health problems such as heart failure or stroke. During pregnancy, chronic hypertension also may affect the growth of the fetus and cause adverse outcomes.

Increase the proportion of adults who have had their blood pressure measured within the preceding 2 years and can state

PERFORMANCE MEASURE: Percent of women delivering a live birth in less than 24 calendar months of delivering a previous live birth.

STATUS: Activ

GOAL To reduce the percent of women whose birth spacing is less than 24 months from one live birth to the next live birth

elivery.

DEFINITIONNumber of women having successive live birth deliveries in less than 24 calendar months / number of live births in a given

calendar year.

Numerator:The number of women whose most recent recorded live birth was less than 24 calendar months prior to the delivery of the

the number of women whose recurrent calendar year live birth.

Denominator:

Total number of women who have at least one prior live birth delivery and who delivered a new live born infant in the current

calendar year.

Units: 100 Text: Percent

HEALTHY PEOPLE 2010 OBJECTIVE Objective 9.2.

Reduce the proportion of births occurring within 24 months of a previous birth. Target = 6%.

DATA SOURCES AND DATA ISSUES

SIGNIFICANCE

Vital Records birth certificates

In 2006, the World Health Organization (WHO) issued a policy brief recommending: After a live birth, the recommended interval before attempting the next pregnancy is at least 24months in order to reduce the risk of adverse maternal, perinatal, and infant outcomes. Shorter spacing interval between pregnancies is associated with premature birth, growth restriction in

the womb, stillbirth and other causes of early infant deaths and even maternal death.
